ORTHODONTIC SELF LIGATING BRACKETS

Self-Ligating 3G:

- Ultra--thin design
- Security lock buckle
- Round and smooth corners
- 80 gauge mesh base
- 17-4 higher-quality stainless steel

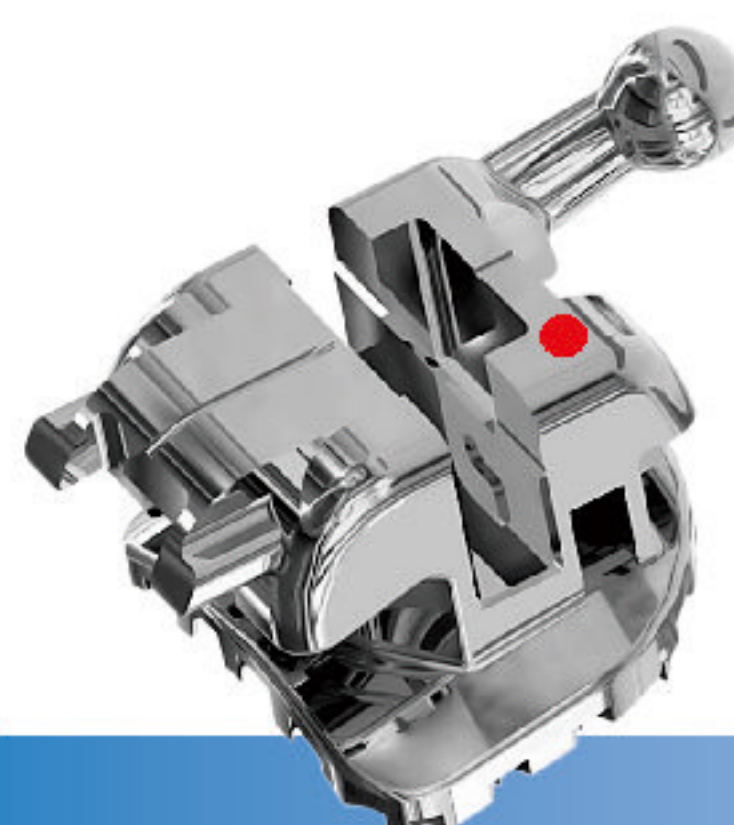

Active Self-Ligating Brackets:

- Reduced friction
- Faster archwire changes
- Full archwire engagement in the slot, increased patient comfort and hygiene
- Reduced number of emergencies
- Reduced root resorption
- Reduced need of extractions due to arch expansion

Self-Ligating 5G:

- Central positioning
- Notch design
- With auxiliary hole
- Proven patented sliding cover unlocking technology
- 80 gauge mesh base
- 17-4 higher-quality stainless steel

Self-Ligating 5G Plus:

- Ultra-thin design, more comfortable and more beautiful.
- With auxiliary groove, you can use arch wire for traction
- 174 stainless steel, higher strength and better durability.

- * 1. Standard Torque
- * 2. High Torque
- * 3. Low Torque

Self-Ligating 7G:

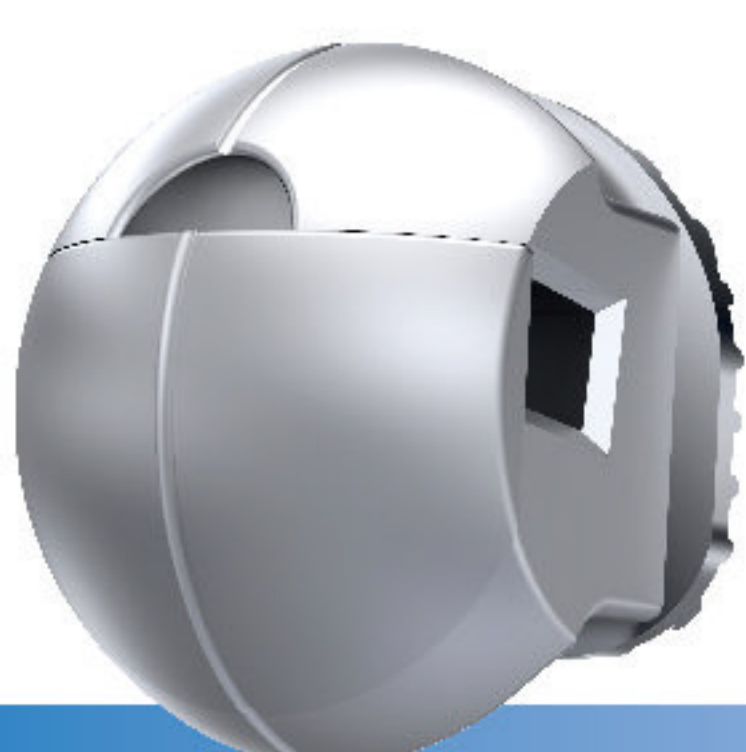

- Central positioning
- Hook could be removed
- With auxiliary hole
- Notch design
- Proven patented sliding cover unlocking technology
- 80 gauge mesh base
- 17-4 higher-quality stainless steel

- * 1. Standard Torque
- * 2. High Torque
- * 3. Low Torque

Self-Ligating 7G Max:

- MIM technology is outstanding
- Dot design is convenient for operation
- Movable hook design to meet different needs
- Multiple torques (Hingh, STD, Low torque)
- Round and smooth, reducing oral ulcers
- 80-day mesh bottom, strong bonding

Self Ligating Q Series:

- Ultra-thin design, smooth and compact
- Strong self-locking clip
- Permanent central axis mark assists bracket in precise bonding and positioning
- Chamfered grooves facilitate archwire insertion and locking plate closure
- Bracket ligation wings are extended for easy ligation and clamping

Self Ligating Q PLUS:

- Wide groove design makes tooth movement easier.
- Simplifies the use of accessories during correction and reduces the complexity of treatment.
- Spherical appearance, more comfortable.
- Improves the problem of insufficient correction force in 3 teeth positions.

Self Ligating FlexiPull:

- Specializes in tooth extraction and efficiently realizes various types of traction
- Multi-hook design, easy traction and root control
- Round and compact, reducing the probability of ulcers
- Innovative wide locking piece, effectively controlling tooth rotation

Ceramic Self-Ligating G Series:

- Hook-shaped design, the product appearance is smoother.
- Crystal color, beautiful and fashionable.
- Wrap-type lock piece design, silky and smooth.
- Special chamfer design, smooth and round grooves
- Curved mesh bottom, precision craftsmanship

Ceramic Self-Ligating 2G:

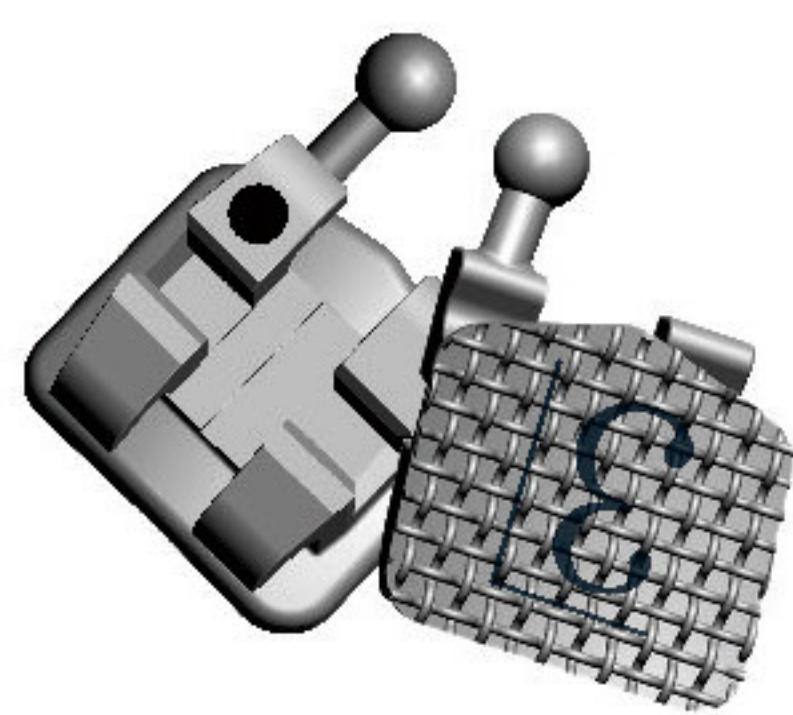

- The rounded and smooth shape
- The curved hook design increases the wearing comfort.
- Transparent material, more beautiful
- Metal lock, more secure

Ceramic Self-Ligating 7G:

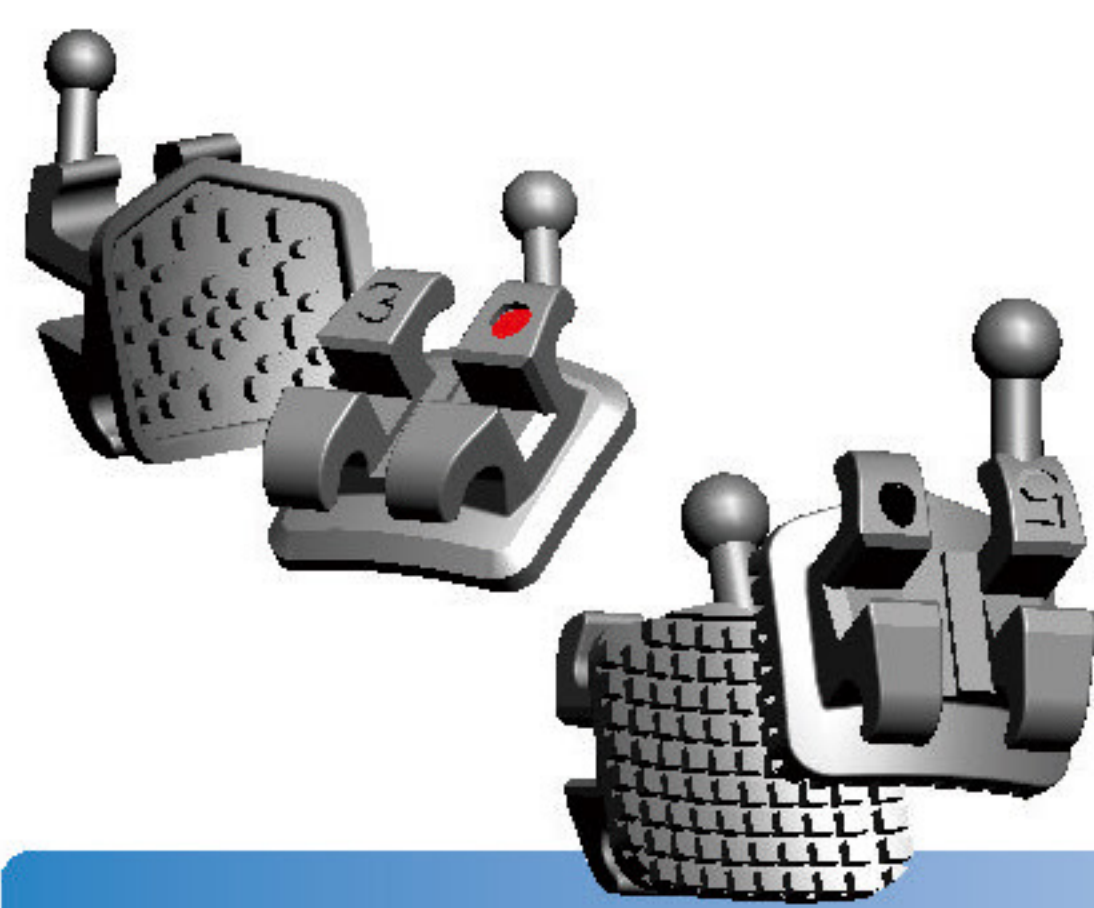

- Transparent material
- Round appearance
- Not easy to stain
- No discoloration
- Bump grid structure
- Firm bonding

ORTHODONTIC BRACKETS

MIM Two-Pieces:

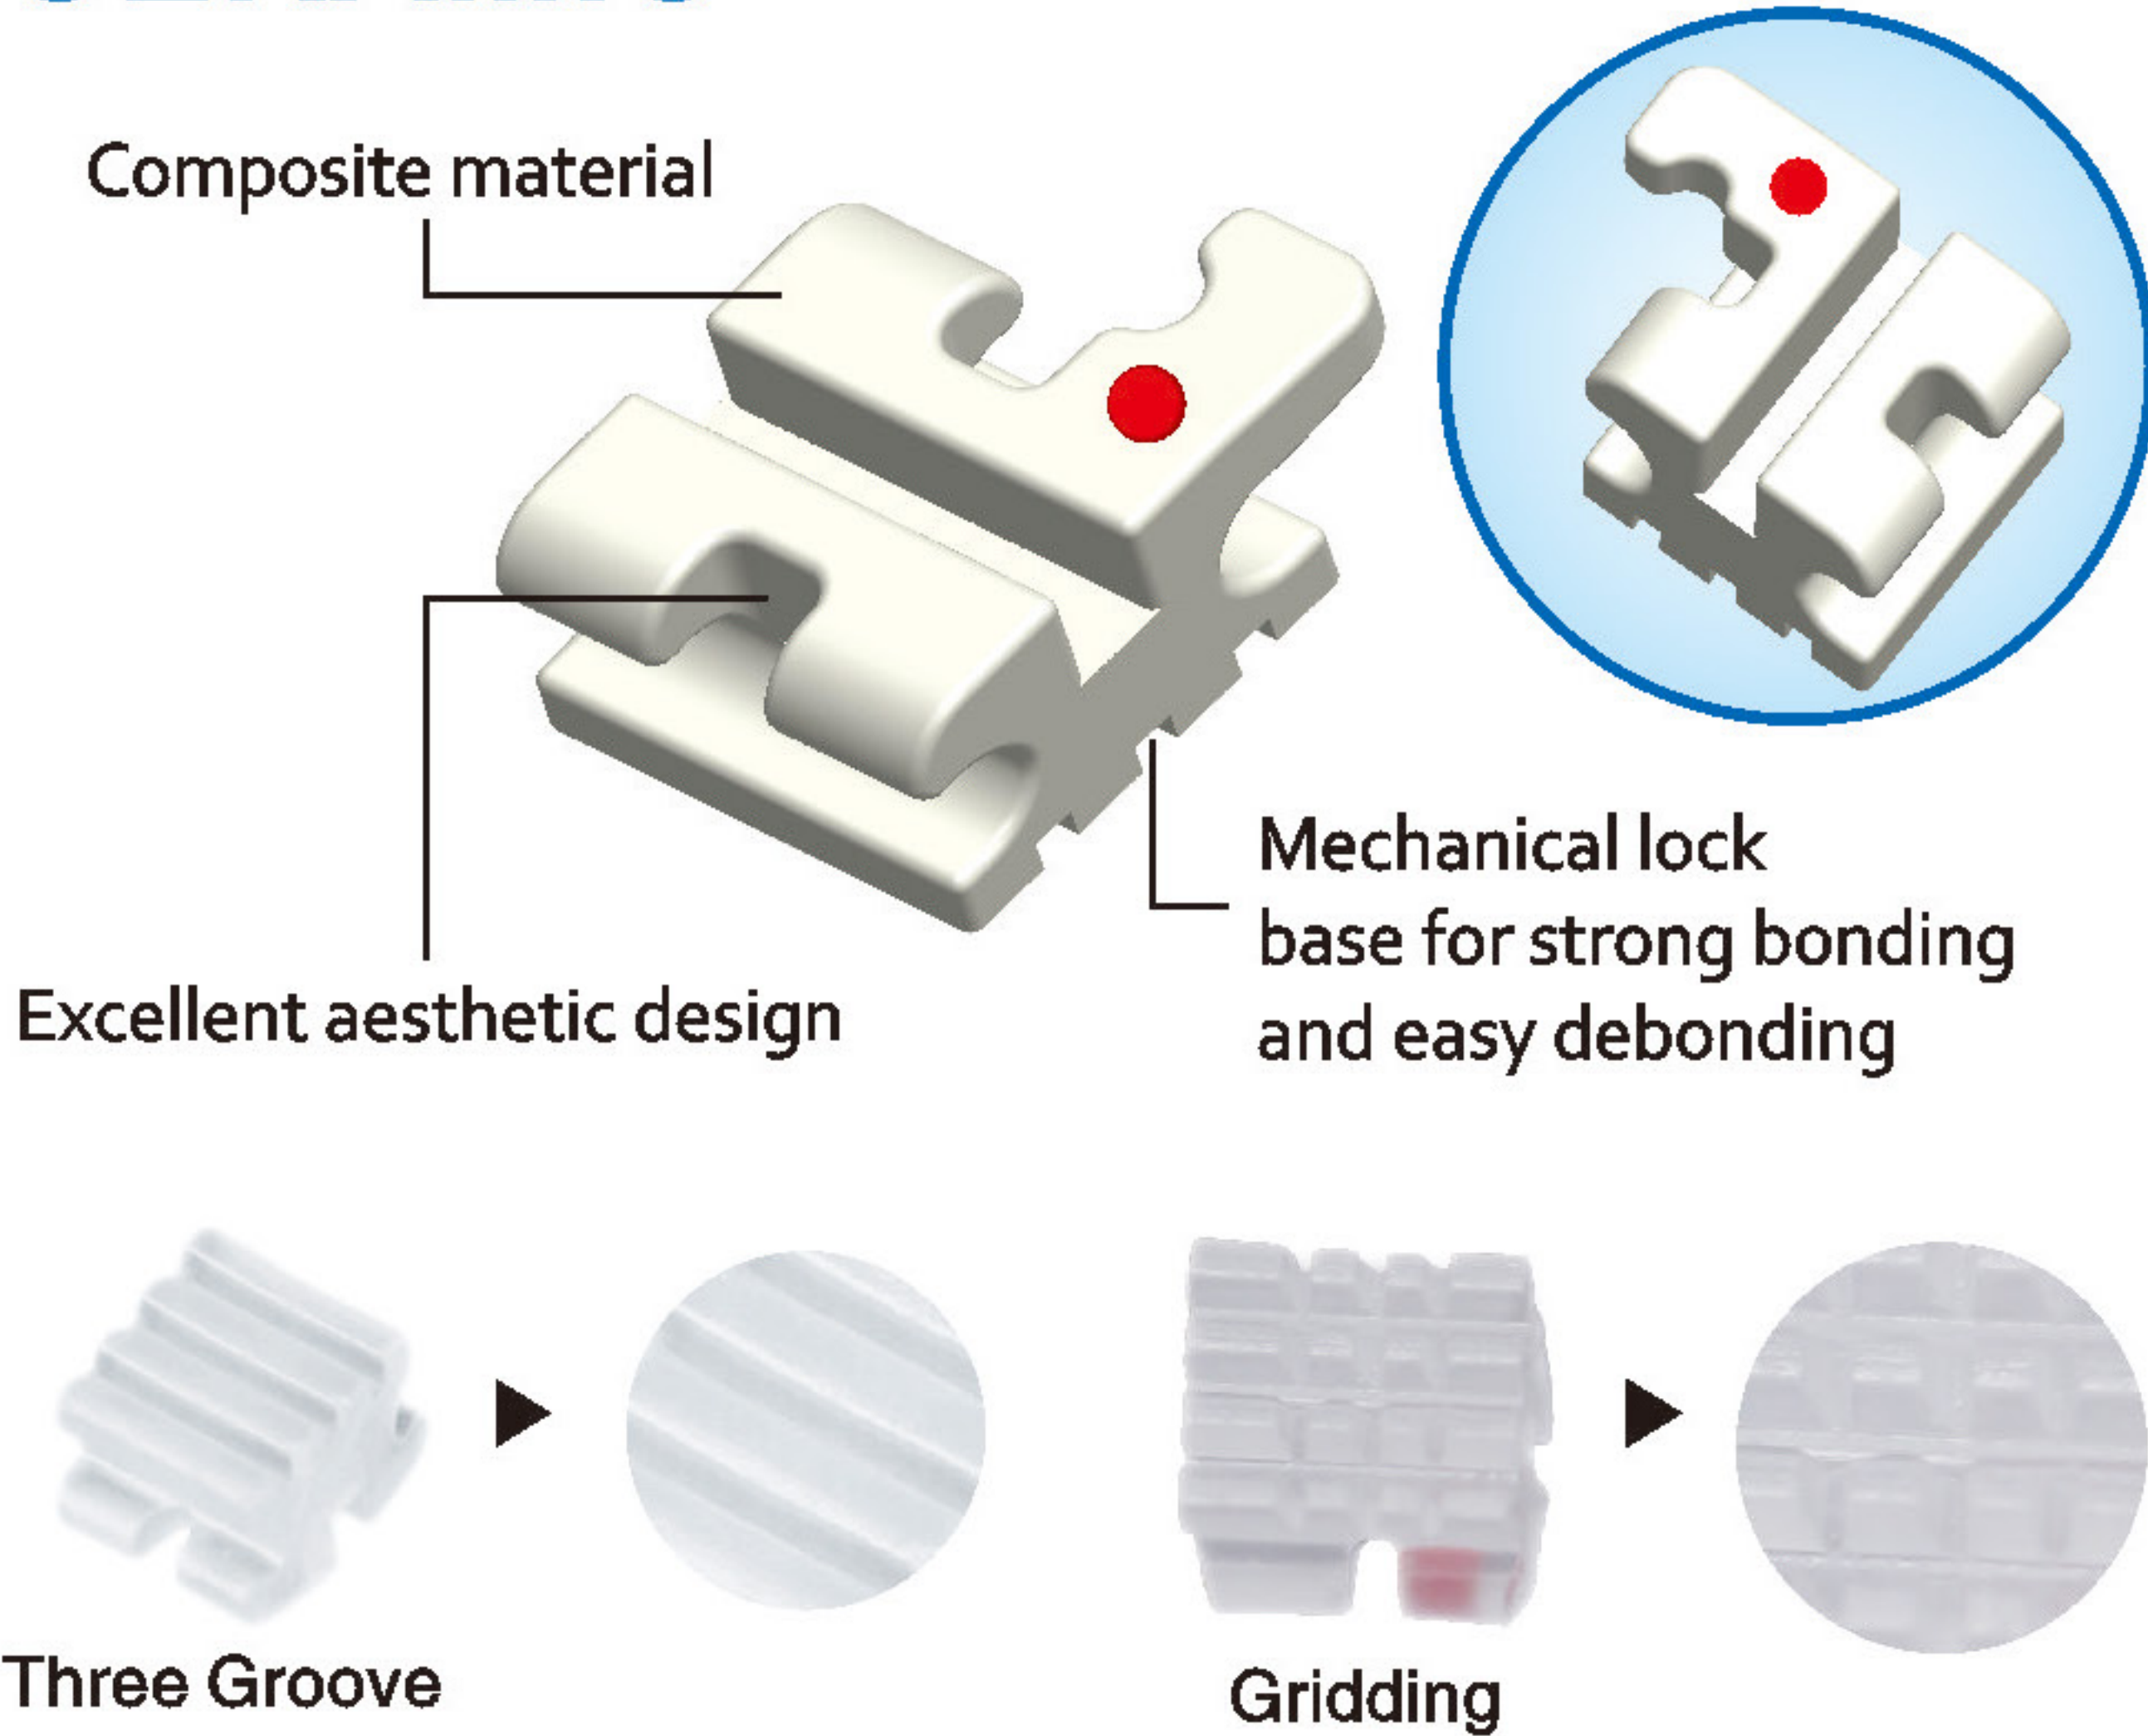

- Ultra-thin design,Smooth surface
- Smooth inner slot,more convenient threading
- Clear central axis makes it easier for doctors
- 80 mesh bottom laser engraved,Stronger bonding

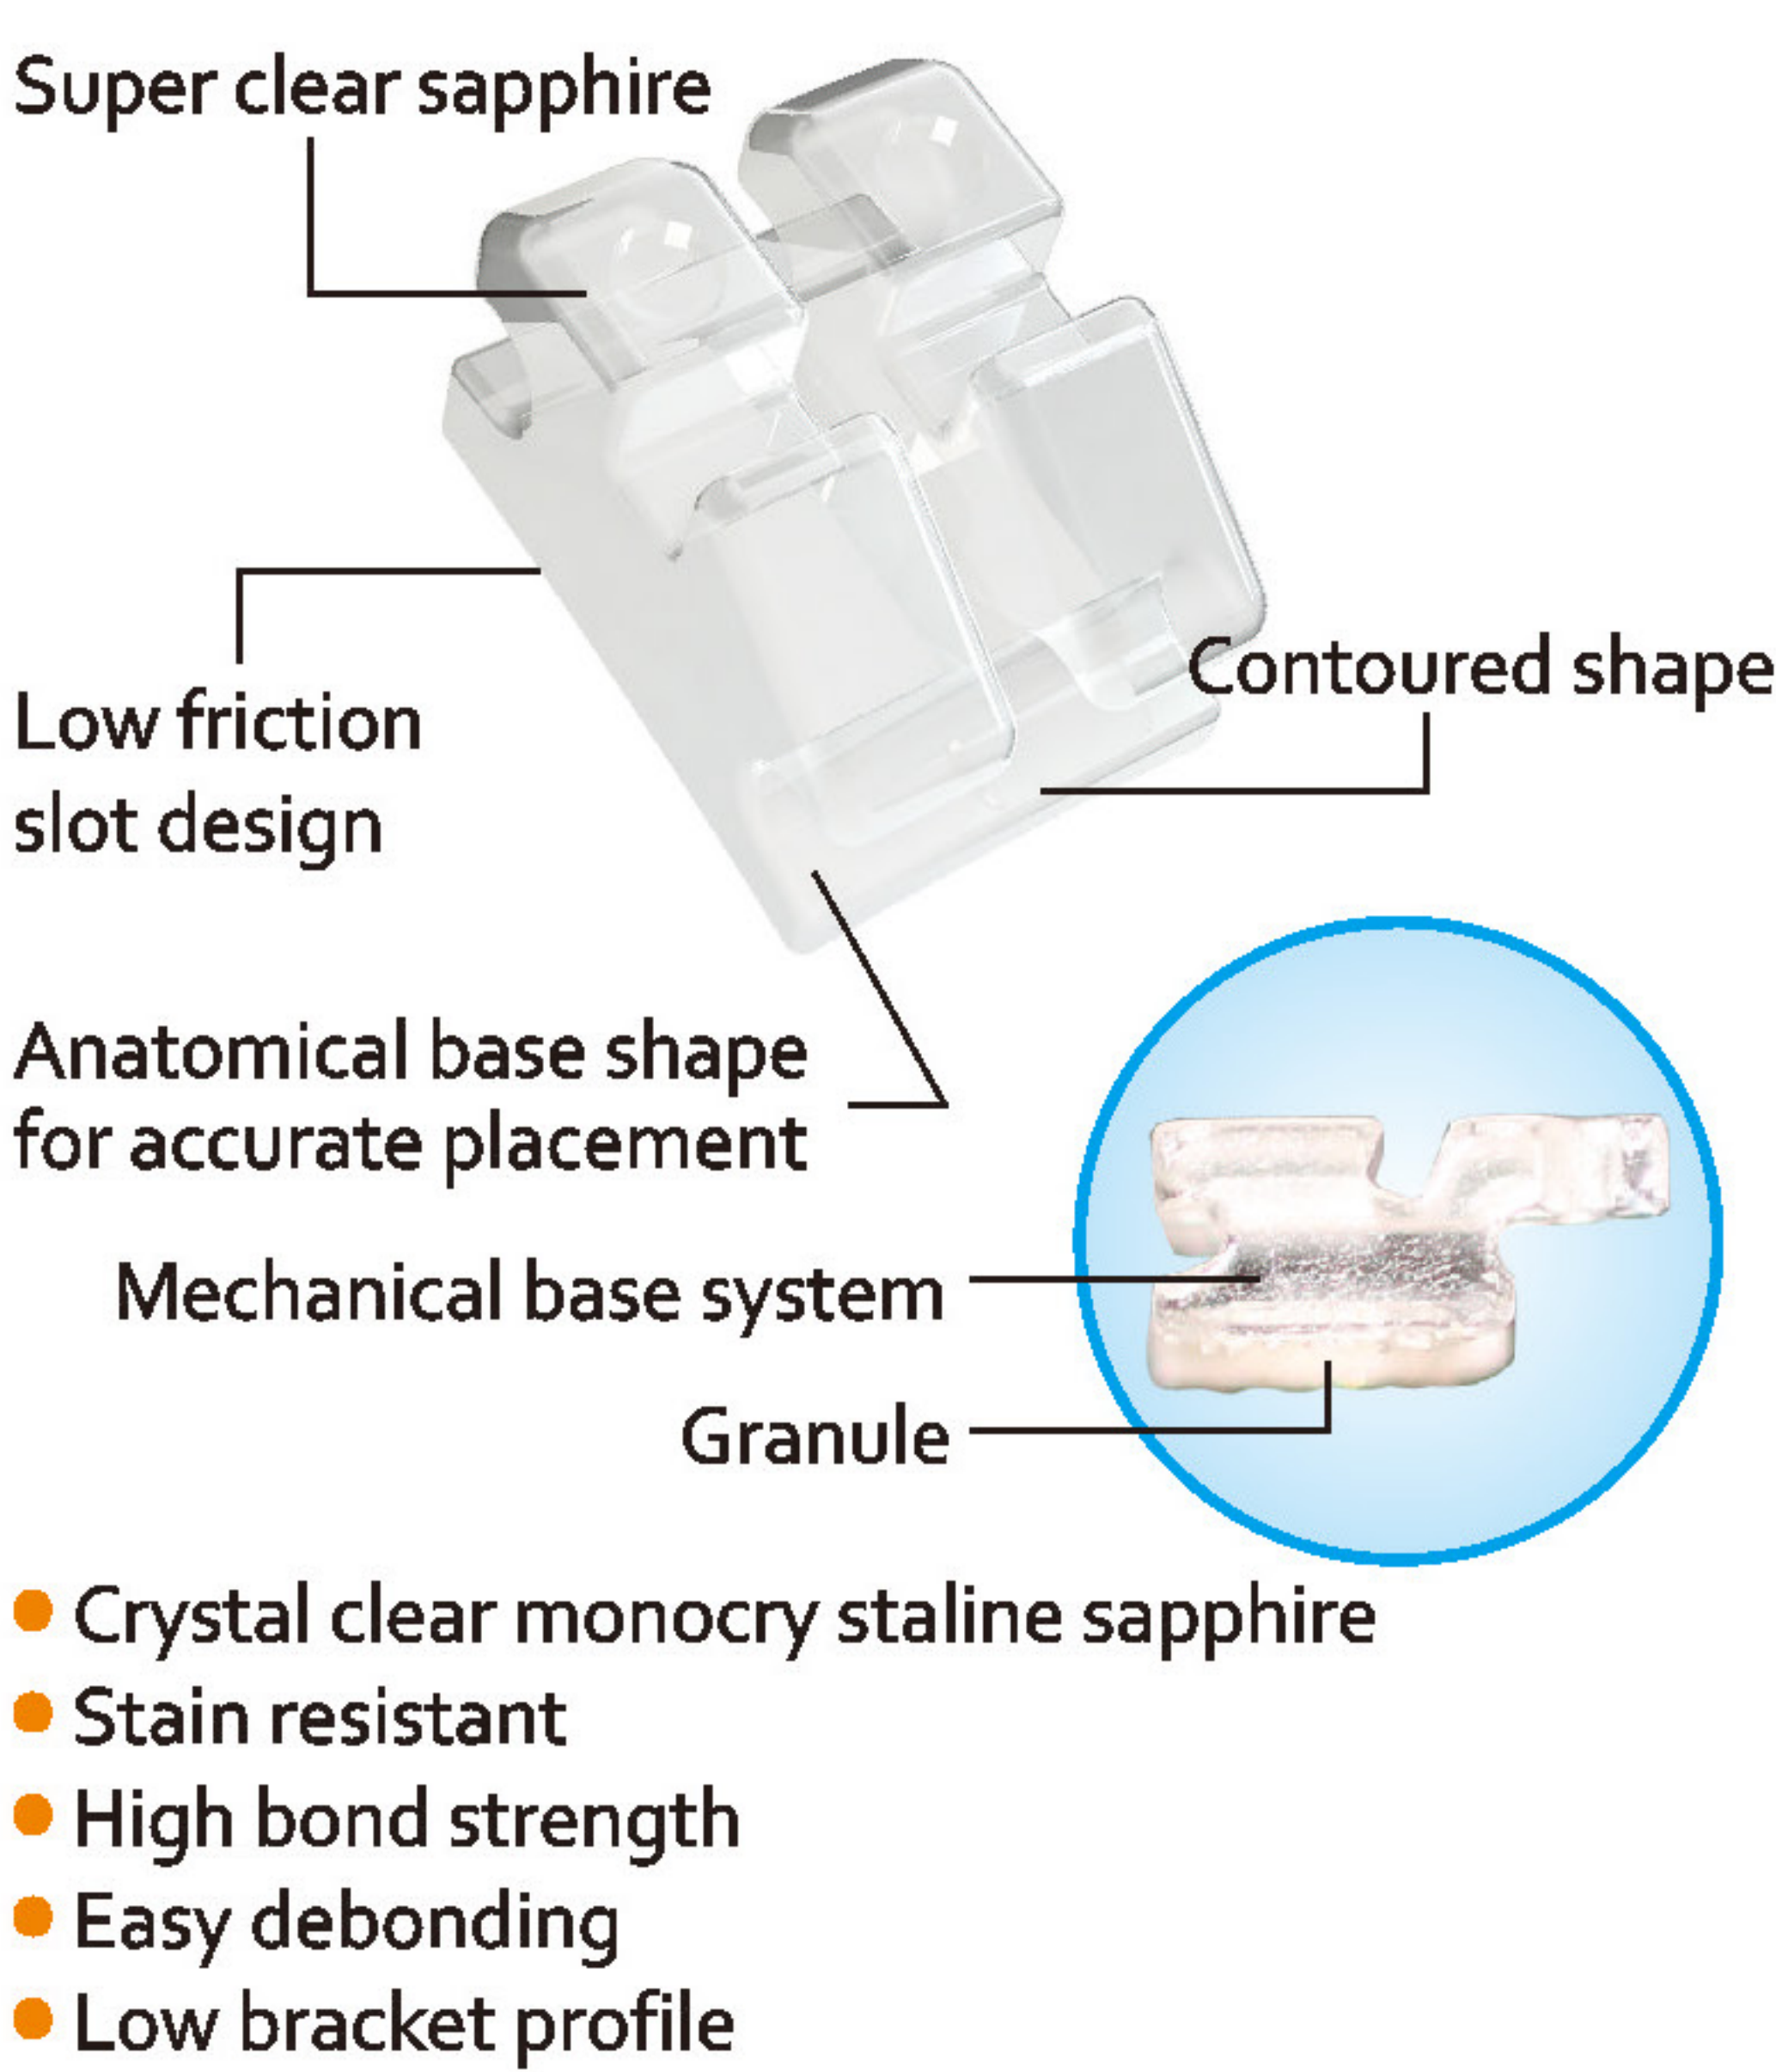

MIM Monoblock:

- Integrated design, Mini size
- The wing has the number mark.
- Ball hook more comfortable
- The bottom is roughened with convex points,Stronger bonding
